

A BREATH OF FRESH AIR!

AIR CONDITIONING SYSTEM SERVICE

Time to breathe new life in to your air conditioning?

Our comprehensive, multi-point service covers the following areas:

- In-car checks for musty odours and excessive condensation
- Drain & evacuate the air conditioning system
- Visually check the oil that is separated during the evacuation process for contamination
- Recharge the system's refrigerant gas
- Replace oil removed during evacuation
- Check operation and condition of compressor drive belt
- Air compressor clutch alignment
- Visually inspect the refrigerant pressure lines, hoses and connections for leaks & damage
- Check cooling fan operation
- Check that the plenum chamber drains are clear and free from obstruction
- In instances where unpleasant odours or musty smells have been noticed, clean the evaporator
